

Admission Statement: 157738 - 162830

Ms. J.L. Campbell,

The board of the Faculty of Science,

Having received your request for admission to the **Master programme in Astronomy**, specialisation(s) in Astronomy Research on 13 January 2016;

In view of the Bachelor honours (from a university) in Astronomy and Physics from the University of Toronto (Canada) you expect to obtain in 2016;

HAS DECIDED

In accordance with: Higher Education and Research Act, 1992, article 7.30b (Admission to a Master degree programme);

To CONDITIONALLY ADMIT you to the Master programme in Astronomy, specialisation(s) in Astronomy Research for the academic year 2016/2017 per 01 September 2016.

The CONDITION(S) OF ADMISSION are:

- Bachelor honours (from a university) and the corresponding transcript of results in Astronomy and Physics from the University of Toronto (Canada).

Important: copies must be certified as genuine (original stamp and signature) by the Head or Registrar of your school or (department of your) institution and should be sent in a sealed school or institution envelope (original stamp and signature) to the Admissions Office of Leiden University (either by you or the school or institution). Certification by other local authorities is not acceptable, nor is a photocopy of a certified copy. If your school or institution cannot meet this request, officially legalised documents, sent to the Admissions Office in an envelope which has been sealed by the designated authority, can be accepted (http://www.government.nl/issues/legalising-documents/legalising-foreign-documents). You are advised to arrange this in good time.

If the original documents are not issued in English, French, German or Dutch, they should be translated by a sworn translator or by the school or institution itself and attached to the original translation. Sworn translations may be sent in a separate envelope if necessary. Please note that if a diploma is requested, but it will not be available before the start of your programme, please instead submit a complete certified transcript or statement of results accompanied by an original statement confirming your diploma or degree.

Please note that all the requirements for admission should be fulfilled before the start of your programme, which means that all the required documents should be received by the Admissions Office (see below for address) before you commence.

A decision as to whether the conditions for admission have been met will be made by the Admissions Office, on behalf of the Board of the Faculty.

All the required documents must be sent by post to:
Leiden University
Student and Educational Affairs, Admissions Office
Pieterskerkhof 6
2311 SR Leiden, The Netherlands
(If using courier delivery, please provide the courier with our phone number: +31 (0)71 527 7287)

Once all admission conditions have been met, the Admissions Office will issue an unconditional statement and inform the Faculty and University Registrar.

Leiden, 25 January 2016

On behalf of the Board of the Faculty,

Mw Drs. A.N.G. Pen-Oosthoek Programme coordinator Astronomy

If you wish to appeal against this decision, you are requested to send a letter containing a copy of the decision to the Examination Appeals Board, P.O. Box 9500, 2300 RA Leiden, the Netherlands. The letter should be sent within six weeks of the date the decision was dispatched. In the letter of appeal, it should state clearly why you do not agree with the decision. The letter must be signed and dated.
